

```
#include <stdio.h>
#include <stdlib.h>
#include <string.h>
#define SIZE 16
int main()
{
    size_t usernameSize = 0;
    char *data1;
    printf ("Please input username:\n");
    getline(&data1, &usernameSize, stdin);
    // remove the new line character
    data1[strlen(data1) - 1] = '\0';
    printf ("You entered: [%s]\nsize of username: %ld\n", data1, strlen(data1));
    free (data1);
    return 0;
}
```
